ФИЛОЛОШКИ ФАКУЛТЕТ

UNIVERZITET U BEOGRADU
FILOLOŠKI FAKULTET

Dear and Highly Esteemed Colleagues,

The Faculty of Philology of the University of Belgrade, being an educational institution which boasts a two hundred years' long tradition in higher education, with a broad educational, cultural and scientific scope of interest and action, by virtue of cherishing the study of 34 languages and their literatures and cultures, represents one of the leading institutions in Serbia in the realm of developing intercultural and multicultural projects.

The Faculty of Philology of the University of Belgrade takes particular pleasure, on this occasion, of inviting you to participate in the proceedings of the international scientific conference *Culture and/or Science*, which will take place in Belgrade, at the Faculty of Philology, from 1st to 3rd June, 2017.

The place science commands in contemporary culture, as well as the place afforded to culture within the realm of modern science, represent one of the focal issues posed in the 21st century. Contemporary Humanities are further oriented to analyzing the large information systems, whether we look towards the Digital Humanities projects, Computing Linguistics or Organization of Knowledge. Purporting to reach the ideals of the scientific and of the exact in essence, as well as to relate to the needs of today's markets, Humanities have to step in tune with the times on one side, while on the other, they risk losing their very own identity. The realities of universities nowadays point to the way in which between culture and science, there stands an excluding conjunction *or*, appearing instead of the inclusive conjunction *and*, not infrequently at the expense of the ostensibly less pragmatic professions. The program of this Conference, in that sense, strives to induce the participants to re-examine the truthfulness of an alternative between culture and science and to discern its importance for contemporary humankind.

In line with this, we propose that the Conference should proceed within the framework of the following scientific areas:

1. Cultural History of Science
2. Science as a Literary Theme and Scientific Grounding of the Methodology in Literary Studies
3. Linguistics and the Exact Sciences in the Contemporary and Within the Historical Context
4. Applying Scientific Methods in Teaching
5. Organization of Knowledge
6. Mechanizing of Translation Systems
7. Humanities and Their Contemporary Trends and Perspectives

Registration Form can be downloaded from the following link: <http://www.fil.bg.ac.rs/lang/sr/fakultet/naucni-skupovi-i-konferencije/>. Filled in forms should be emailed to the following address: culture.science@fil.bg.ac.rs, prior to March 1, 2017.
